PROFESSIONAL SUMMARY

Results-driven Python Full Stack Developer with 1+ year of experience designing and deploying scalable web and mobile applications using Python, Django, REST API, and Flutter. Proficient in full-cycle development — from database architecture with MySQL, SQLite, and Firebase to responsive front-end delivery with HTML5, CSS3, and Bootstrap. Consistently delivers production-ready solutions with measurable improvements in performance, speed, and user experience. Strong advocate of clean MVC architecture, agile collaboration, and API-first development.

TECHNICAL SKILLS

Languages: Python, JavaScript, Dart

Frameworks: Django, Django REST Framework (DRF), Flask, Flutter, Bootstrap

Frontend: HTML5, CSS3, Bootstrap, Responsive Web Design

Databases: MySQL, SQLite, Firebase Realtime Database, Firebase Firestore

APIs & Arch: REST API Design & Integration, MVC Architecture, JSON, Postman

Tools: Git, GitHub, VS Code, PyCharm, Linux

PROFESSIONAL EXPERIENCE

App & Web Developer — *Bhuvi Tech Web Solutions* | 2025 – Present

- Engineered and deployed 3+ full-stack web applications using Python and Django, reducing average page load time by 35% through query optimization and template caching strategies.
- Designed and implemented 10+ RESTful API endpoints using Django REST Framework (DRF), supporting 500+ concurrent requests with zero downtime and enabling seamless mobile-web data exchange.
- Developed cross-platform mobile applications with Flutter and Dart, achieving a 98% crash-free session rate and reducing release cycle time by 25% through modular component architecture.
- Optimized MySQL and SQLite database schemas via indexing and query refactoring, cutting database response time by 40% on data-intensive modules.
- Integrated Firebase Realtime Database for live data synchronization with sub-200ms latency, improving user engagement by 20% across active sessions.
- Built responsive, mobile-first UIs with HTML5, CSS3, and Bootstrap across 5+ browsers; collaborated in a 4-member agile team via Git/GitHub with 100% code review coverage.

PROJECTS

AI-Powered Face Recognition Staff Attendance Management System | *Python • Flask • OpenCV • Face Recognition • MySQL • HTML • CSS • JavaScript • Bootstrap*

- Developed a web-based staff attendance management system that uses AI-powered facial recognition to automate employee check-in and check-out.
- Captured live video from a webcam and recognized registered employees using face recognition, recording attendance automatically in a MySQL database.
- Included secure administrator authentication, staff management, attendance reports, manual attendance entry, and a real-time dashboard for monitoring attendance records.

Multi-Platform Food Delivery & E-Commerce Mobile Applications | *Flutter • Dart • Firebase • REST APIs • Android SDK • Gradle • Laravel Backend • Git*

- Developed and customized multiple food delivery and e-commerce mobile applications, including SoniyaMart, DRS Mart, DoorDrop, and OrderOK, with dedicated Customer, Vendor, and Delivery Partner apps.
- Implemented UI customization, API integration, Firebase services, authentication, order management, real-time delivery workflow, and push notifications, along with bug fixes.
- Configured Android builds, resolved package and Gradle issues, and successfully deployed production-ready applications.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications (BCA) — *Alpha Arts and Science College, Chennai* | 2021 – 2024

GPA: 8.4 / 10 (84%) — Graduated with Distinction

Python Full Stack Developer Certification — *VYTVDC* | 2024 – 2025

Core areas: Python, HTML, CSS, JavaScript, Bootstrap, Django, MySQL
